ALEX R. CHEN

Full Stack Software Engineer | alex.chen@example.com | +1 (555) 019-2834 | github.com/alexchen | linkedin.com/in/alexchen

EDUCATION

Bachelor of Technology in Computer Science and Engineering — GPA: 3.85 / 4.0 (2022 - 2026)

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C++, Java, SQL, C, HTML5, CSS3
Frameworks & Libraries: React, Node.js, Express.js, Next.js, Spring Boot, Tailwind CSS, Redux
Databases & Caching: MongoDB, PostgreSQL, MySQL, Redis, DynamoDB
Tools & Cloud: Docker, Kubernetes, AWS, Git, GitHub Actions, CI/CD Pipelines, Linux, Postman
Core CS Concepts: Data Structures, Algorithms, System Design, RESTful APIs, Microservices Architecture, OOP

PROJECTS

1. Scalable E-Commerce Microservices Platform

Tech Stack: Node.js, Express.js, React, MongoDB, Redis, Docker, AWS
• Architected high-throughput microservices capable of processing 5,000+ checkout orders/min with Redis distributed locks.
• Deployed containerized services on Docker and AWS with automated CI/CD pipelines and JWT authentication.

2. Real-Time Collaborative Document Editor

Tech Stack: TypeScript, React, Node.js, PostgreSQL, WebSockets, Docker
• Engineered real-time document synchronization via WebSockets and Operational Transformation with sub-50ms latency.
• Optimized database queries and composite indexing on PostgreSQL, reducing read query latency by 45%.

3. Distributed URL Shortener & High-QPS Analytics Engine

Tech Stack: Python, FastAPI, Redis, PostgreSQL, Docker, Nginx
• Designed high-availability URL shortener leveraging Base62 encoding and Redis LRU caching for 10M+ daily hits.
• Configured Nginx reverse proxy with Token Bucket rate limiters to mitigate DDoS attacks and protect API capacity.
